

FAJAR ARIEF BUDIMAN

Fullstack Developer | Backend-Focused | Go · PHP · Flutter · React · PostgreSQL
Tangerang, Banten • budimanfajar660@gmail.com • +62 838-7363-0760 • fajarariefbudiman.vercel.app

PROFESSIONAL SUMMARY

Fullstack Developer with 2+ years of professional experience architecting and shipping production-grade systems across diverse industries. Specialized in backend engineering with Go and PHP (Laravel), designing RESTful APIs consumed by thousands of daily users, and implementing JWT/RBAC authentication with multi-tenant isolation. Experienced with Odoo ERP customization and third-party integrations including Xendit Payment Gateway. Independently designed and shipped two free mobile apps. Finora (financial tracker) and Kurva (POS) for Indonesian SMEs and young entrepreneurs. Track record spans healthcare ERP, franchise POS platforms, clinic management systems, and personal finance applications.

TECHNICAL SKILLS

Languages: Go (Golang), PHP, JavaScript, TypeScript, Dart, SQL, HTML5, CSS3

Frameworks: Laravel, Gin (Go), Flutter, React.js, Bootstrap 5, Tailwind CSS

Databases & Tools: PostgreSQL, MySQL, Redis, Git, Docker (basic), Postman, Linux CLI, VS Code

ERP & APIs: Odoo ERP, RESTful API, JWT, OAuth2, RBAC, Signed URL, Xendit Payment Gateway

Practices: Clean architecture, MVC, API versioning, DB optimization, agile/scrum

PROFESSIONAL EXPERIENCE

Backend Developer - PT Kuliner Kreasindo Inovasi

Dec 2025 – Present

- Architect backend for Centralized Partnership & POS Platform serving hundreds of franchise partners; built 30+ RESTful API endpoints covering order management, inventory, authentication, and RBAC.
- Implemented secure JWT multi-tenant authentication and Signed URL-based file access, eliminating public storage exposure.
- Integrated Xendit Payment Gateway for automated payment verification on Repeat Orders and Sales Orders across all mitra outlets.
- Managed and customized Odoo ERP modules for procurement, inventory management, and partner operational workflows.
- Collaborated daily with frontend team to define API contracts, align integration requirements, and maintain structured documentation.

Freelance Fullstack Developer - PT Gerin Mitra Husada

Dec 2024 – Nov 2025

- Delivered Dokterhub, a full-featured clinic ERP (Laravel 10 + Bootstrap 5) supporting 3+ departments including real-time patient-doctor chat via Laravel Broadcasting & Pusher.
- Built automated PDF generation for medical records, prescriptions, and billing using DomPDF, reducing admin workload by 80%.
- Implemented RBAC for staff, doctor, and admin roles across all clinic modules.

INDEPENDENT PROJECTS

Finora - Mobile Financial Tracker (Flutter)

2026

- Personal finance app with income/expense tracking, investment monitoring, budget goals, savings targets, and non-financial habit goals (e.g., daily gym) that don't affect cash flow - built on double-entry accounting principles.
- Released free for Indonesian SMEs and young entrepreneurs to promote financial literacy and accounting awareness.

Kurva - Mobile Point of Sale (Flutter)

2026

- Lightweight offline-capable POS app with product catalog, transaction processing, sales history, and basic reporting - designed for non-technical UMKM owners.
- Distributed free to lower the barrier of digital sales adoption for small and micro businesses.

EDUCATION

Bachelor of Computer Science – Informatics Engineering - University of Pamulang

2023 – Present

SMA Negeri 4 Kabupaten Tangerang

2020 – 2023

ADDITIONAL

Languages: Bahasa Indonesia (native), English (technical reading & writing - proficient)
