PERSONAL PROFILE

Fullstack Developer with 2+ years of production experience building end-to-end systems across React.js, Go, PHP (Laravel), and Ruby on Rails, containerized with Docker. Skilled in RESTful API design, JWT/RBAC authentication with multi-tenant isolation, admin panel development, Odoo ERP (v15) customization, and Xendit payment integration, with a track record spanning POS platforms, healthcare ERP, and personal finance apps. Also founded DiGiat Group, a digital agency delivering websites and applications for Indonesian SMEs, and personally closed its first client partnership, now growing into the holding company Mulqi Group.

PROFESSIONAL EXPERIENCE

Fullstack Developer, PT Kuliner Kreasindo Inovasi

Dec 2025 - Present

- Designed and built a crew attendance system from scratch for outlet staff using React.js and Go, containerized with Docker, covering clock-in/out tracking, detailed attendance records, and an integrated payroll/salary calculation module.
- Developed the admin panel/backend dashboard for a centralized Partnership & POS platform serving hundreds of franchise partners, with 30+ RESTful API endpoints covering order management, inventory, authentication, and RBAC.
- Integrated Xendit Payment Gateway for automated payment verification on repeat orders and sales orders.

Founder & Lead Developer, DiGiat Group

Nov 2025 - Present

Side business, run alongside full-time employment

- Founded and personally closed the initial client partnership now expanding into Mulqi Group, a holding company under development, with DiGiat operating as one of its digital-agency units.
- Own the full sales-to-delivery cycle: client discovery calls, scope and pricing negotiation, requirements gathering, and full-stack implementation.
- Personally test and debug every deliverable prior to launch to ensure code quality and stability, and provide post-launch support.
- Designed and shipped Navila, a Flutter + Go mobile app for couple finance management and wedding planning, featuring a shared wallet, cash flow tracking, an approval system, and a wedding checklist module; published live on digiatgroup.com.

Fullstack Developer, PT Gerin Mitra Husada

Dec 2024 - Nov 2025

- Delivered Dokterhub, a full-featured clinic ERP (Laravel 10 + Bootstrap 5) supporting 3+ departments, including real-time patient-doctor chat via Laravel Broadcasting & Pusher.
- Built automated PDF generation for medical records, prescriptions, and billing using DomPDF, reducing admin workload by 80%.

OTHER EXPERIENCE

- Actively develop side products under DiGiat Group, including Navila, which now serves as both a live product and a portfolio piece.
- Act as both business decision-maker and hands-on technical lead in building Mulqi Group as a holding company.

TECHNICAL SKILLS

- Languages: Go (Golang), PHP, Ruby, JavaScript, TypeScript, Dart, R, SQL, HTML5, CSS3
- Frameworks: Laravel, Gin (Go), Ruby on Rails, Flutter, React.js, Bootstrap 5, Tailwind CSS
- Database & Tools: PostgreSQL, MySQL, SQLite, Redis, Git, Docker, Postman, Linux CLI, VS Code
- ERP & APIs: Odoo ERP, RESTful API, JWT, OAuth2, RBAC, Signed URL, Xendit Payment Gateway
- Practices: Clean architecture, MVC, API versioning, database optimization, agile/scrum, containerization (Docker)

PERSONAL SKILLS

- Leadership and decision-making in founding and running a business from the ground up
- Client management: communication, negotiation, and end-to-end expectation-setting
- Time management balancing a full-time job with a growing side business
- Problem-solving and attention to detail in testing, debugging, and quality assurance

EDUCATION

University of Pamulang - Informatics Engineering, B.S.

2023 - Present

GPA: 3.49 (in progress)
