

FAJAR ARIEF BUDIMAN

Fullstack Developer | Go · PHP · Ruby on Rails · Flutter · React | Tangerang, Indonesia

budimanfajar660@gmail.com | +62 838-7363-0760 | fajarariefbudiman.vercel.app | github.com/fajarariefbudiman

PROFESSIONAL SUMMARY

Fullstack Developer with 2+ years of production experience (since Jan 2024), shipping systems end-to-end across React.js frontends and Go, PHP (Laravel), and Ruby on Rails backends, containerized with Docker. Specialized in RESTful API design, JWT/RBAC authentication with multi-tenant isolation, and admin panel development, with hands-on experience in Odoo ERP (v15) customization and Xendit Payment Gateway integration. Track record spans POS platforms, healthcare ERP, and personal finance applications.

Beyond employed engineering work, founded DiGiat Group, a digital agency delivering websites and applications for Indonesian SMEs, and personally closed the initial client partnership now growing into Mulqi Group, a holding company currently under development. Also uses R for data analysis.

TECHNICAL SKILLS

Languages: Go (Golang), PHP, Ruby, JavaScript, TypeScript, Dart, R, SQL, HTML5, CSS3

Frameworks: Laravel, Gin (Go), Ruby on Rails, Flutter, React.js, Bootstrap 5, Tailwind CSS

Databases & Tools: PostgreSQL, MySQL, SQLite, Redis, Git, Docker, Postman, Linux CLI, VS Code

ERP & APIs: Odoo ERP, RESTful API, JWT, OAuth2, RBAC, Signed URL, Xendit Payment Gateway

Practices: Clean architecture, MVC, API versioning, DB optimization, agile/scrum, containerization (Docker)

PROFESSIONAL EXPERIENCE

Fullstack Developer, PT Kuliner Kreasindo Inovasi

Dec 2025 - Present

- Designed and built a crew attendance system from scratch for outlet staff using React.js and Go, containerized with Docker, covering clock-in/out tracking, detailed attendance records, and an integrated payroll/salary calculation module.
- Developed the admin panel/backend dashboard for the Centralized Partnership & POS Platform, serving hundreds of franchise partners with 30+ RESTful API endpoints covering order management, inventory, authentication, and RBAC.
- Integrated Xendit Payment Gateway for automated payment verification on Repeat Orders and Sales Orders.

Founder & Lead Developer, DiGiat Group

Nov 2025 - Present

Side business, run alongside full-time employment

- Founded and personally closed the initial client partnership that is now expanding into **Mulqi Group**, a holding company currently under development, with DiGiat operating as one of its digital-agency units delivering website and application development for Indonesian SMEs.
- Own the full sales-to-delivery cycle: client discovery calls, scope and pricing negotiation, requirements gathering, and full-stack implementation.
- Personally test and debug every deliverable prior to launch to ensure code quality and stability, and provide post-launch support.
- Designed and shipped **Navila**, a Flutter + Go mobile app for couple finance management and wedding planning, featuring a shared wallet, cash flow tracking, an approval system, and a wedding checklist module; published as a live product on digiatgroup.com.
- Balance client-facing business ownership (deal-closing, timelines, client relationships) with hands-on engineering work outside of full-time employment hours.

Fullstack Developer, PT Gerin Mitra Husada

Dec 2024 - Nov 2025

- Delivered Dokterhub, a full-featured clinic ERP (Laravel 10 + Bootstrap 5) supporting 3+ departments, including real-time patient-doctor chat via Laravel Broadcasting & Pusher.
- Built automated PDF generation for medical records, prescriptions, and billing using DomPDF, reducing admin workload by 80%.

EDUCATION

Bachelor of Computer Science, Informatics Engineering

2023 - Present

University of Pamulang | GPA: 3.49 (in progress)
